M-PAD Plus

Kitchen Display System

A powerful way to speed up service to your customers and increase employee productivity.

- Powerful Processing
- Flexible Configuration
- Quick and Reliable Installation
- Maintenance Free Operation

M-PAD Plus Kitchen Display System

System Features

- Identical items are consolidated in each order for quick reference.
- A timer for each order shows the elapsed time each order has been displayed.
- Condiments and elapsed order time display in different colors for quick and easy identification.
- Large orders simply overflow to the next order box.
- After 8 orders are displayed, additional orders are stored in memory.
- Previously cleared orders can be recalled.
- Production statistics report allows manager to quickly monitor processing times.
- Built-in, on-demand diagnostics, statistics and help functions.

System Options

- Orders can be cleared from the display with one key stroke, or –
- Orders can be highlighted viewing overflowed orders, or just marking the current order being prepared.
- Items can be automatically sorted within each order for displaying priority, such as hot items on the top and cold items on the bottom.
- Key items can be tracked for easy food prep.
- Elongated mode is available.
- Videos may be re-routed during peak and off-peak periods.
- Monitor mode available at backroom CRT for the manager.

- Easy to Install
- Low Cost Video Solution
- Durable Membrane Switches
- High Volume Speaker
- Real-Time Clock
- Upload/Download From Any Windows Computer
- 166 MHz Processor
- 2 Serial Ports
- 1 Ethernet Port
- 1 USB Port
- 1 PS/2 Port For Keyboard
- PC Keyboard Support For Use in Programming (Not required for standard operation.)
- Compatible With All MicroPlus Video Software

Compatibility

The M-PAD Plus controller unit provides 100% backward compatible software migration for all vendor applications currently running with the MicroPlus M-PAD or PC based KDS products.

Controller

Weighing just 19 oz., the M-PAD Plus controller is small in size but is a powerful workhorse for kitchen display systems. This miniature device is ideal for tight placement with the kitchen workplace while handling all the requirements of today's KDS demands. (5.47"L x 4.44"W x 1.05"H)

Keypad

The M-PAD Plus's stainless steel, 21 key, spill-resistant keypad is used to control the access of new orders, park orders, clear completed orders from the display, and recall previously cleared orders back to the display. This same keypad controls the display of the key item summary. This plug and play device provides a tactile feel 7x3 key matrix for a total of 21 keys to perform all KDS functions at a press of a key. (6"L x 3.16"W x 0.73"H)

Key Item Summary

All key item orders on or off the display can be consolidated and displayed in an easy to read highlighted 'Key Items' window. This summary consolidates identical main items (not including condiments) to allow the cook or preparer to easily see the total quantity of key items for all orders displayed and pending. Up to ten key items may be listed.

Production Statistics

The Status Report provides management with detailed order processing statistics for managing productivity and customer service.

- Separate tracking for this screen and entire store.
- The 'total order count' is the total number of orders cleared from the display since the last reset.
- The 'average process' time is the average length of time (minutes and seconds) all orders were on the display before they were cleared.
- The amount of time each order required to process is summarized into ten 30 second time frames for easy analysis.
- The report can be reset at any time for hourly, peak period, shift, or daily analysis.

Easy to Install

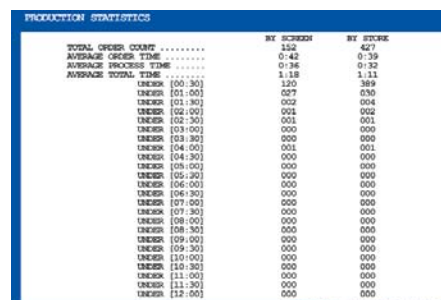

The M-PAD Plus controller is a snap to install with no jumpers or internal settings. Using only the configuration menu, select your preferred vendor built-in KDS software application. Then plug in a VGA monitor, power cord, RS-232C or Ethernet link, and your keypad. Connect multiple M-Pad Plus units as required for your system using the optional router.
