

NITROUS:

Nitrous oxide is a safe and effective sedative that is inhaled through a small mask that fits over your nose to help you relax.

Nitrous oxide, also known as “laughing gas,” is one option Dr. Shah may offer to help make you more comfortable during certain procedures.

It is not intended to put you to sleep. You will be able to hear and respond to any requests or directions Dr. Shah may have.

Ultimately, you should feel calm and comfortable. The effects of nitrous oxide wear off soon after the mask is removed.

Talk to Dr. Shah about whether nitrous oxide would be a good option for you.
