

FREQUENTLYASKED QUESTIONS

Q. What is Permanent Make-up?

A. It is an invasive procedure where pigment (color) is carefully applied into the dermal layer of the skin, after the healing process, make-up will not smudge, smear or run. The color is placed with a specially designed and approved instrument.

Q. Is there discomfort involved?

A. The sensation of microimplantation can differ from person to person. Local anesthetic is used and Nitrous Oxide is available.

Q. Is it safe?

A. The CDC (Center for Disease Control) standards are utilized at all times. Sterilization and aseptic technique are used in the office. Most supplies are one time use (Disposable)

Q. Is infection possible?

A. Any time the skin is opened even from a minor scratch, infection is possible. However, if post care procedures are strictly observed, there should be no major complications.

Q. Are there precautions that I must take before any procedure?

A. Only with the lips. Anyone having a history of fever blisters, cold sores, shingles, or canker sores must get a prescription for an antiviral medication. Valtrex is one drug that helps to eliminate the possibility of the virus erupting after the procedure.

Q. How permanent is the procedure?

A. Micropigmentation is considered to be a permanent/semi-permanent process. Over a period of time, fading will occur and a maintenance visit will be necessary to maintain color. There is a nominal charge for the maintenance visit

Q. I'm interested in Permanent Cosmetics. What steps do I take to get started?

A. Call **(405) 620-5246** for your appointment. At this time any additional questions will be discussed.

Full Lips/Brows/Eyeliner:....	\$900.00
Correction:.....	\$ Varies

Maintenance – Per Visit

Eyeliner:	\$150.00
Brows:.....	\$150.00
Full Lip or Lip Liner:.....	\$200.00

REASONS FOR PROCEDURES

- Eyebrows that are sparse, uneven or absent
- Dexterity difficulties, arthritis and vision limitations that inhibit accuracy when applying eyeliner and fine make-up features.
- Allergies or contact lenses that cause watery eyes and smudged eyeliner. Eyes that appear washed out without eyeliner.
- Daily responsibilities that result in little time for make-up application.
- Desire the convenience of make-up that will not smudge, smear or run.
- Lips with little definition or color, thin lips, or uneven lips that detract from facial symmetry. Lips that have lost color from age, plastic surgery, lip augmentation or trauma.
- Experienced hair loss from eyebrows and from eyelashes.

GIFT CERTIFICATES
ARE AVAILABLE
