1-2011

*We VALUE our customers!*

You may have read the Dallas Morning News front page article on Christmas Day, 2010, but if you didn't, you missed the inspiring story of the family that has recently moved into the 7th House on the Corner (HOTC7) built by the congregation of Christ United Methodist Church (CUMC) in Plano, Texas.

This story touches the A-All family because we have treated every House on the Corner for termites since the very first one was built in 2003. This donation is lovingly given by our company, employees, and on occasion we even get the help from a chemical supplier to provide the termiticide.

Homer Fincannon has only missed one of these treatments. As most of you know, he likes to make sure things run smoothly at the termite jobs.

David and Ann Fincannon are members of CUMC, which is how we had the original opportunity to help with this mission. Over the years many of our technicians have been able to help on the treatments and it is always looked forward to by them every year.

### Insect of the Quarter:

#### Carpenter Ants

- Their reproductives have wings
- Warm winter days will stir up the reproductives resulting in calls to our office with worries about termites
- Easier and less expensive to control than termites

## Cold Temperatures Move the Animals Inside

Our recent cold snap has been moving wildlife into homes to keep warm. While they don't want to sit in the living room and watch TV with you, they sure don't mind hanging out in the attic or crawl-space enjoying the warmth you can provide.

So, remember to give us a call if you hear any scratching in the walls or scurrying or movement up in the attic or between floors. Our technicians are climbing atop roofs and looking around the perimeter of homes every day to locate holes where

these critters are entering. We can get these places closed up quickly and get those unwanted guests removed from your home.

## With A-All You have more than 1 Entomologist

**Russ Smith, CA, ACE**

You may have met our technician Russ Smith before at your home. Russ has been with A-All since 1997, when he moved to the Dallas area from Austin, Texas. Russ has been a great addition to our team. He is an extremely knowledgeable man, and in January 2009 he took an exam to become an Associate Certified Entomologist (ACE). Naturally, he passed! Now, there are just not that many ACEs in the country, let alone in the Dallas area, so we are very proud of the fact that we have two entomologists at our company. If you ever have an insect that needs to be identified we can certainly help. You may always specifically request Russ to come to your home if you are in need of his expertise. He

is definitely our best man for ant issues and many other general pest needs. If you prefer one of our other techs but need an insect identified just keep a sample in a zip baggie or container and it can be brought in to the office for our entomologists to identify.

Please feel free to brag about Russ on the review section of [Yellowpages.com](http://Yellowpages.com) so others know about his great service. On the internet just go to [yp.com](http://yp.com) and enter A-All Pest Control and Dallas, TX to find our company. Select the A-All Pest Exterminators Inc link and under the company name you're allowed to "Write a review".
