

Extended Yield

Maximize Your Print Budget

printXL® cartridges provide increased output at a minimized cost-per-page.

West Point Products' printXL® extended yield cartridges are designed, engineered, and manufactured to offer superior quality and performance while surpassing even the highest OEM page yields. Utilizing next generation technology, printXL® cartridges guarantee higher yields and lower cost-per-page without sacrificing density or print quality. While some aftermarket solutions may simply offer more toner in the cartridge, printXL® cartridges are designed to withstand the additional component wear that results from the higher page counts. West Point Products' Advanced Life Cycle Testing™ protocols were incorporated into the test procedures to ensure consistent and reliable performance.

printXL®

Why printXL® Cartridges?

- Maximize value while minimizing cost-per-page
- Guaranteed print density performance throughout the life of the cartridge
- 100% guaranteed page yield
- Ideal for MPS (Managed Print Solution) environments
