

MICR Solutions

West Point Products provides multiple solutions that meet or exceed the high standards needed to support check printing. Our broad selection of remanufactured and Genuine-New MICR products is the largest in the market, providing businesses with the quality they require, the value they need, and the superior environmental solution they want.

Remanufactured MICR Solutions

West Point Products develops and sells remanufactured MICR cartridges that meet all US and Canadian specifications for signal strength. By using a special high adhesion toner formula, designed specifically for your printer, we can significantly reduce the possibility of costly fees stemming from rejected checks.

All of West Point Products' MICR products are post tested and come with a 100% satisfaction guarantee.

Genuine-New MICR Solutions

West Point Products Genuine-New MICR cartridges contain all original OEM components while utilizing a specially formulated MICR toner developed to meet all US and Canadian banking standards. The toner inside of a MICR Print Solutions cartridge also contains a security feature that helps to virtually eliminate the risk of check fraud. West Point Products' Genuine-New MICR products provide superior performance and an alternative to high-priced OEM products.
