

The Performance Advantages of Bamboo Fusion

Environmentally Friendly

Solid flooring construction; made from 100% rapidly renewable Moso bamboo.

Tough & Durable

Patented technology provides for excellent indentation resistance; twice as tough as Red Oak and 30% harder than traditional bamboo floors.

Greater Stability

Twice as stable as solid Red Oak. Less expansion and contraction - minimal gapping.

Indoor Air Quality

Hypoallergenic as well as Leadership in Energy and Environmental Design (LEED®) accredited. Emission levels lower than World Health Organization (WHO) standards.

Scratch Resistant

Latest generation Klumpp® Aluminum Oxide coating system provides superior protection.

Installation Systems

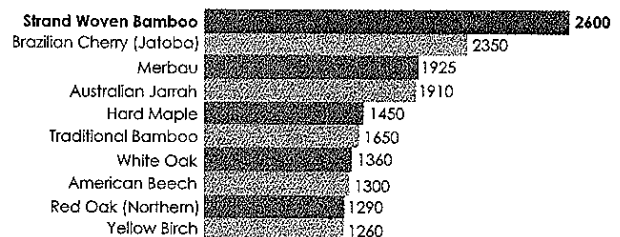

Available in solid T&G and the green Uniclic® floating floor system. Bamboo Fusion can be quickly installed on any level of your home. Approved for installations over most in-floor radiant heating systems.

Quality Warranty

Lifetime Limited Structural Warranty¹
 5 Year Commercial Finish Warranty²
 25 Year Residential Finish Warranty

Janka Hardness Scale (PSI)

(The higher the number, the harder the)
